

If your puppy is a princess, you'll
protect her from anything.

Especially secondhand smoke.

Dogs living with a smoker are more likely to die of cancer, nicotine poisoning, and tobacco-related illnesses. We can help you quit smoking to protect your pet's health—and your own. A Quit Coach® will support you over the phone and online. You may receive free nicotine patches or gum. Enroll today.

It's FREE. It's confidential. It works.
